TIPS Journal Passes 4.4 Million Reads and Launches New Website

Open-access TIPS Journal marks the milestone with a new website built for practitioners, researchers and the public

Hamilton, Ontario – October 1, 2026 – The Infection Prevention Strategy (TIPS) is pleased to announce that the TIPS Journal (InfectionControl.tips) has passed 4.4 million reads since its launch on November 15, 2015, and today launches a new website for the journal.

"One person can make a difference, and everyone should try. Every one of those 4.4 million reads is a practitioner, researcher or member of the public who came looking for clear, practical science – and found it free to read. This milestone belongs to our volunteer authors, reviewers and Advisory Board." – Michael Diamond, Executive Director, TIPS

The TIPS Journal (ISSN 2369-7342) publishes peer-reviewed research and Perspective articles on infection prevention from contributors around the world. Its most-read articles include *6 Factors That Have Caused Antibiotic Resistance* (more than 400,000 reads) and *Insurance Companies Pay the Price for HAIs* (more than 330,000 reads).

The new website makes the journal's work easier to find, read and share:

- All articles sorted into 13 clear topics, from Hand Hygiene to Antimicrobial Resistance & Stewardship
- Peer-reviewed research with downloadable scientific PDFs, citations and reviewer credits on every article
- Author pages for 200 contributors
- A simple online proposal process for new Peer-Reviewed and Perspective articles
- One-click sharing to social media and other platforms
